## Sika ComfortFloor® Marble FX

SEAMLESS DECORATIVE POLYURETHANE FLOORING: UNDERFOOT COMFORT AND  
ENDLESS CREATIVITY

# Sika ComfortFloor® Marble FX

The solution is where the design desire is

**EXTEND YOUR CREATIVITY** on the floor with different application tools and Sika ComfortFloor® Marble FX system.

## Sika ComfortFloor® Marble FX SYSTEM

### CREATIVITY

Sika ComfortFloor® Marble FX is the latest PU coating system from the Sika ComfortFloor® range. Through a newly developed coloring method of the base material Sikafloor®-3000 FX, it is possible to create various structures and patterns during installation. Depending on the tool used, fine structures or marble-like patterns can be created. The professional applicator is able to design tailor-made floors for your object in a variety of basic colors. In addition, Sika ComfortFloor® Marble FX meets the highest standards of underfoot comfort as well as abrasion resistance and resistance to mechanical damage.

### SUSTAINABILITY

In the development process we made sure that the system meets the strictest emission requirements of various green labels in order to protect the applicator and, later on, the users of the buildings, in terms of ecology, health and safety.

### MATT LOOKING FLOOR SURFACE

Part of the Sika ComfortFloor® Marble FX is the new Sikafloor®-306 W top coat, which gives the floor surface a elegant matt look and makes the seamless coating system easy to clean.

### Sikafloor®-3000 FX – THE BASE COAT OF Sika ComfortFloor® Marble FX SYSTEM

The newly developed base coat offers many advantages for the user as well as for the professional applicator during the application process:

- Two part, aliphatic PU
- Solvent free
- Self smoothing
- Very low VOC emission
- Comfortable
- Foot warm
- Permanently elastic
- Good mechanical resistance
- Very high yellowing resistance
- Decorative designs due to the special blend of pigments
- Easy to apply

Layer	Product
1. Primer	Sikafloor®-154/-161/-701
2. Base coat	Sikafloor®-3000 FX
3. Top coat	Sikafloor®-306 W

### Sikafloor®-306 W – THE TOP COAT OF Sika ComfortFloor® Marble FX SYSTEM

Sikafloor®-306 W is the result of the latest sealer development and an extension of the Sika ComfortFloor® range. Its appearance is more matt than existing sealers, which results in an extra elegant looking surface and makes Sika ComfortFloor® Marble FX outstanding. Additionally it is elastic and can therefore very well withstand point loads.

Key advantages:

- Two part, aliphatic PU
- Very low VOC and odor
- Water based
- Easy to apply
- Good UV and yellowing resistance
- Elastic, resistant against point loads
- Easy to clean

Inspiration from our environment and from everywhere.

Lime Green

May Green

Purple

Wild Orchid

If you use a special notched trowel you can create an effect which looks similar to wood.

Or just use different kind of rollers, which can create a more uniform structured pattern.

# COLOR SCHEMES BRIMMING WITH CHARACTER

For a meaningful floor design

**A WELL-CRAFTED COLOR PALETTE** can do wonders for an interior space.

The use of color and graphic images can align to the existing logo and symbolic color of the building type to achieve an overall visual aesthetic, while it can also elicit emotions and unique perceptions of space. It has an ability to calm or excite, can make a room appear smaller or more grandiose, or even trigger subconscious reactions. Color is the most vital, impactful and expressive design element in a designer's toolbox.

The color examples shown on page 3 and 7 illustrate how the visual effect appears in different color shades. For the Sika ComfortFloor® range we supply 72 standard colors. Out of this range most colors are also available with Sikafloor®-3000 FX. Please ask your local Sika country organization about the possibilities.

Inspiration from our environment and from everywhere.

Ice Blue

Matt Rose

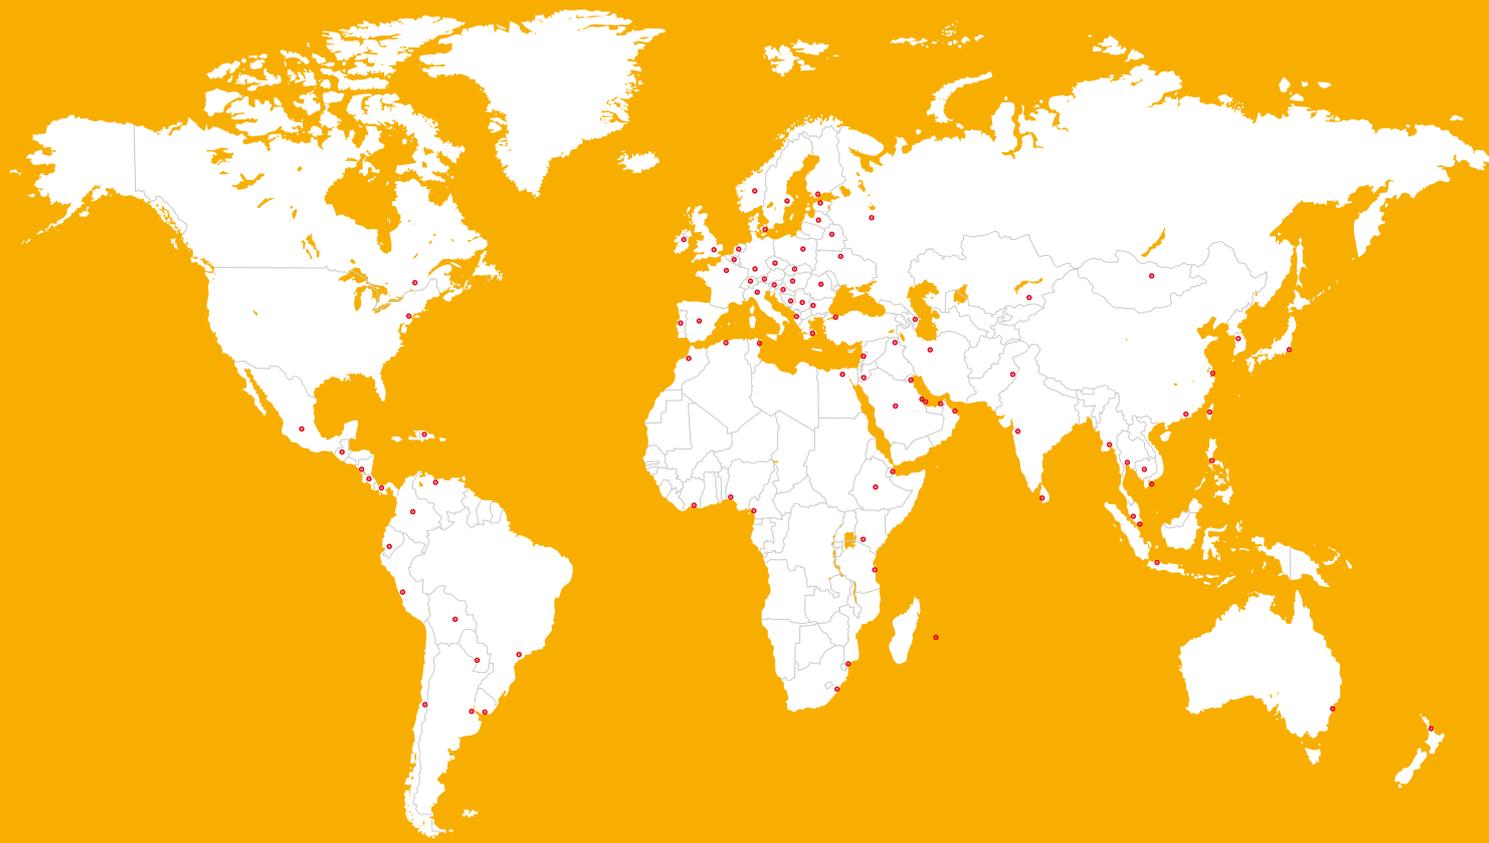

Brilliant Blue

Violet Blue
