

SUSTAINABILITY PORTFOLIO MANAGEMENT

Sustainability Portfolio Management (SPM) is the mechanism used by Sika in order to evaluate and classify its products in defined market segments in terms of Performance and Sustainability. The outcome of the SPM evaluation is a portfolio of “Sustainable Solutions” – products with combined significant Sustainability and Performance benefits.

The evaluation criteria that fall under the sustainability category of SPM are presented in the infographic below.

SIKA SUPPLIER CODE OF CONDUCT

Sharing values for more success

REPUTATIONAL AND BUSINESS RISKS

Addressing current and future sustainability risks

CHEMICAL HAZARD AND EXPOSURE

Assessing and eliminating chemical hazards and exposure

REGULATORY TRENDS

Aligning product developments with regulatory trends and stakeholder expectations

AIR QUALITY AND EMISSIONS

Products that promote good air quality and minimise emissions

HEALTH AND SAFETY

Products that are healthy, safe and easy to use

SPM SUSTAINABILITY ASSESSMENT

ENERGY

Products that promote energy efficiency principles

CLIMATE

Products that minimise the impact on the climate

RESOURCES

Efficient use of precious resources

PACKAGING

Prioritizing the use of responsible packaging for products

GREEN BUILDING

Products that contribute to Green Building Standards

COST SAVINGS DOWNSTREAM

Helping customers to directly, measurably and significantly reduce costs

Sika MonoTop®-1010

MORE PERFORMANT – MORE SUSTAINABLE

MORE PERFORMANT MORE SUSTAINABLE stands for Sika's product innovation through a unique combination of higher performance and proven sustainability benefits. A Sustainable Solution is a product in a given application which combines superior performance with a significant sustainability contribution within its technology range for our customers.

PRODUCT CHARACTERISTICS AND BENEFITS

Sika MonoTop®-1010 is a new high performing and sustainable bonding primer and corrosion protection slurry for concrete repair and protection, containing fly ash as a supplementary cement material (SCM). With one 25 kg bag of mortar, Sika customers benefit from:

- approx. 3.5 kg CO₂ savings
- direct contributions to LEED v4

CLIMATE: REDUCED CARBON FOOTPRINT

Sika MonoTop®-1010 has a reduced carbon footprint as a result of the replacement of Portland cement with fly ash within its formulation. When compared to a reference cementitious concrete repair mortar, Sika MonoTop®-1010 shows an approx. 25% reduction in Global Warming Potential (GWP). This corresponds to approx. 3.5 kg of CO₂ saved per 25kg bag of mortar.

- A Life Cycle Assessment (LCA) was conducted in order to generate the GWP figures presented in this factsheet. The goal of the LCA was to compare the formulation of the fly ash-blended product to the formulation of the reference cementitious concrete repair mortar in order to evaluate the impact of the improved formulation.
- LCA is a standardized method used to assess and compare the inputs, outputs and potential environmental impacts of products and systems. The LCAs conducted internally by Sika are performed according to ISO 14040 and EN 15804 standards and make use of the CML 2001 impact assessment methodology. Sika LCAs make use of Sika and industry-standard data.

GREEN BUILDING: MEETS LEED V4 REQUIREMENTS

Sika MonoTop®-1010 is part of the Sika LEED product portfolio and conforms on three LEED v4 credit requirements, thus directly contributing to the attainment of 3 points. More details about the individual credit fulfillment are given in the Sika LEED Attestations.

- LEED v4 MRc 2 (Option 1): Building Product Disclosure and Optimization – Environmental Product Declarations
 - contribution to the attainment of 1 full point under this credit.
- LEED v4 MRc 3 (Option 2): Building Product Disclosure and Optimization – Sourcing of Raw Materials
 - contribution to the attainment of 1 full point under this credit.
- LEED v4 MRc 4 (Option 2): Building Product Disclosure and Optimization – Material Ingredients
 - contribution to the attainment of 1 full point under this credit.
